Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,525,118 to Hergenrother et al.

4. This patent shows rubber compositions used in tire applications, see the abstract. This patent further incorporates compounds falling within the scope of formulae (II) and (III), see column 7 lines 59 through column 8 line 33. These compounds are disclosed as being dispersing agents. The HLB limits of the dependent claims are considered to be inherently possessed by the compounds given that they can be the same compounds. The only difference between the claims and the cited art is that the art is silent as to using the rubber composition in sidewall applications. It would be obvious to use the composition shown in the art in sidewall applications. One

of ordinary skill would be motivated to use the composition as a sidewall given the knowledge generally available to one of ordinary skill and the appreciation of the properties possessed by the composition. One of ordinary skill appreciates that the compositions of the art possess properties that render it desirable as a sidewall application. One of ordinary skill appreciates that compositions used in tread applications can be used in sidewall applications.
